Assignments were easy to complete if you followed the syllabus and did the homework as you learned.
Textbook was not helpful
Caroline Yang is a wonderful teacher
I took AP Statistics in high school instead of AP Calculus. I was told I had to take this Math 110 course because I did not take Calc. I must say I am extremely disappointed in this class. I have been dumbfounded throughout the course with how elementary the subjects taught in class are compared to the online homework. When students ask why the homework is so difficult in comparison to the middle school level math taught in class, the professor responds by saying it would take too long to go over the difficult problems so she does the easy ones. The professor refuses to teach the material that students need to learn for the homework which has left me frustrated with this course and made to go to the math help center regularly.
The pace of the class was great for the amount of material we had to learn and the examples we went through in class really helped me prepare for exams
Professor Yang is an amazing teacher. Really cares about the well-being and education of her students. The course is well structured and paced. Perfect amount of time to learn and understand concepts to greatest capacity.
My teacher was awesome. She really cares about making sure students understand what is happening in class and how to solve problems and was very open to helping during office hours or after class as well. I am weak in math but as the semester progressed I feel much more confident in my math abilities.
I thoroughly enjoyed this course. It did a very good job of covering the ground I lost during my middle/high school years in regards to math. Professor Yang was also a phenomenal teacher.

Comments
Caroline Yang was an excellent instructor!
Great instructor
This instructor is inconsistent and rude. There are three tests given in this course (aside from the final). The first two tests were graded accordingly but the last test was not. Many students received poor grades on their last test including me even though I had the correct answers. It felt like a slap in the face to see the right answers and work I did on a test with a poor grade written at the top. The professor insisted that work must be shown to get credit on the answers. I was very upset to see my two pages of scratch work was not enough for her although it had been on the previous tests. There were some questions I simply did not do any work for because I got the answers from simply looking at the question. I was unaware that these elementary questions needed in depth explanations when they did not in the previous tests before. I felt as though this professor was having a bad day and was taking it out on her students. When I, as well as many other students approached her respectfully after class, in the hopes of getting some credit back, she responded offensively and sharply.
Caroline Yang is easily accessible and is willing to make more office hours to help her students.

Caroline Yang was an excellent teacher. Certainly one of the best math teachers I have ever had. She taught in such a way that everyone understood and picked up on new topics quickly. I wish I could have her for all of my math classes.

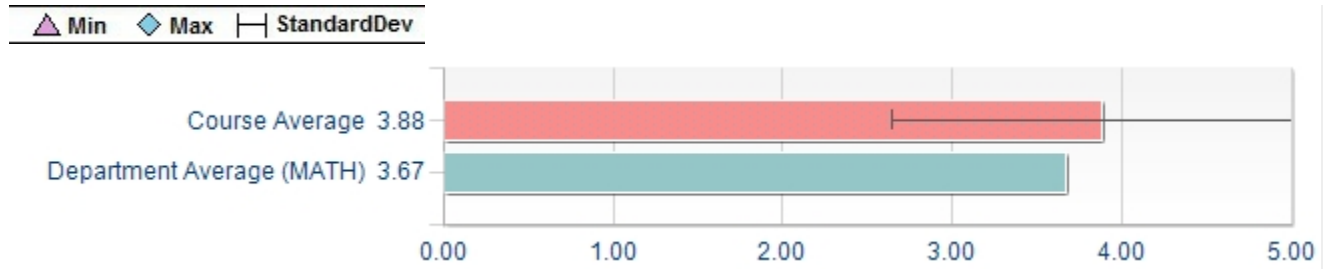

If you would recommend this Instructor for a teaching award, please briefly explain why.

Comments
Caroline Yang made sure that each student got help and adequately understood the material she was teaching. She went at an excellent pace, and adequately prepared us for tests.
I liked her teaching style. She made things understandable and every time that we had a sub, I felt like I was not learning the material as well as I did with her.
Lectures were very clear
Seriously the best math teacher I have ever had. She was genuinely very sweet and caring. She explained everything very well every class.
Overall, Yang is a great professor as well as a great person.
Professor Yang is very passionate about teaching this course and the success of her students. She goes above and beyond to accommodate her students to ensure that they receive the best learning experience possible. She is patient and kind.
She so understood every student's individual need. She took her time on any questions asked and no question was disregarded or criticized. Her classroom is a very non-judgemental place and she treats every student equally and respectfully. As someone who has always struggled with math, I extremely value her skill and dedication. Great class!
She is an excellent teacher that explains her subject well.
She truly exemplifies what it means to be a teacher who cares about her students and wants them to grasp the material.
Caroline Yang was an excellent teacher. Certainly one of the best math teachers I have ever had. She taught in such a way that everyone understood and picked up on new topics quickly. I wish I could have her for all of my math classes.
